PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference PHNL031228WO	FOR FURTHER ACTION	See item 4 below			
International application No. PCT/IB2004/051910	International filing date (day/month/year) 29 September 2004 (29.09.2004)	Priority date (day/month/year) 06 October 2003 (06.10.2003)			
International Patent Classification (8th edition unless older edition indicated) See relevant information in Form PCT/ISA/237 Applicant KONINKLIJKE PHILIPS ELECTRONICS N.V.					

1.	This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).				
2.	This REPORT consists of a total of 8 sheets, including this cover sheet.				
	In the attached sheets, any reference to the written opinion of the International Searching Authority should be read as a reference to the international preliminary report on patentability (Chapter I) instead.				
3.	. This report contains indications relating to the following items:				
	Box No. I	Basis of the report			
	Box No. II	Priority			
	Box No. III	Non-establishment of opini applicability	on with regard to novelty, inventive step and industrial		
	Box No. IV	Lack of unity of invention			
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement			
	Box No. VI	Certain documents cited			
	Box No. VII	Certain defects in the intern	national application		
	Box No. VIII	Certain observations on the	international application		
4.	4. The International Bureau will communicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but not, except where the applicant makes an express request under Article 23(2), before the expiration of 30 months from the priority date (Rule 44bis .2).				
			Date of issuance of this report 10 April 2006 (10.04.2006)

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/IB2004/051910

_	Вох	No	. 1	Basis of the opinion
1.	With	lang	luag	to the language, this opinion has been established on the basis of the international application in e in which it was filed, unless otherwise indicated under this item.
		This lang	is op guag ider	inion has been established on the basis of a translation from the original language into the following get in the language of a translation furnished for the purposes of international search Rules 12.3 and 23.1(b)).
2.	With	h rec	gard ary t	I to any nucleotide and/or amino acid sequence disclosed in the international application and to the claimed invention, this opinion has been established on the basis of:
a. type of material:				
	1		a se	equence listing
			tab	le(s) related to the sequence listing
b. format o		nat o	f material:	
			in v	written format
			in o	computer readable form
	C.	time	of f	iling/furnishing:
				ntained in the international application as filed.
				ed together with the international application in computer readable form.
			fur	nished subsequently to this Authority for the purposes of search.
;	3. 🏻	h:	as b	dition, in the case that more than one version or copy of a sequence listing and/or table relating therefore the control of the subsequent or additional is is identical to that in the application as filed or does not go beyond the application as filed, as oppriate, were furnished.
	4. A	dditi	iona	comments:

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

WO9519076, Scientific Atlanta Inc., 13-07-1995 D1:

WO03058961, Koninklijke Philips Electronics N.V., 17-07-2003 D2:

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of independent claims 1,6,7,11,12,13,14,15 is not new in the sense of Article 33(2) PCT. Furthermore, none of the dependent claims in the present application seems to meet the criteria of Article 33(1) PCT.

Independent Claims 1,6,7,11,12,13,14,15 - Novelty 2 Claim1

The document D1 discloses (the references in parentheses applying to this document):

" A system for distributing a signal carrying a plurality of services (see D1, page 3, lines 9 - 15, page 7, lines 22-31, page 11, lines 19- 28, figure 1, elements BS1..BSn), the system comprising:

a transmitter for generating numbering information pertaining to the plurality of services, for including the numbering information into the signal, and for transmitting the signal, (see D1, page 2, line 36 - page 3, line 6, page 3, lines 18-25, page 4, lines 1-33, page 9, lines 21-34, page 11, lines 19-28, page 13, lines 1-20, page 14, lines 27-34, figures 2, 3, elements 46,48, figure 7)

a receiver for receiving the signal, for retrieving the numbering information from the signal, and for numbering services of the plurality of services in dependence of the numbering information (see D1, page 3, line 25 - page 4, line 20, page 9, lines 22-34, page 11, lines 19-28, page 13, lines 21-35, page 17, lines 3-21, page 21, lines 21-32, figure 6, element 92, figure 7)."

Consequently, the subject-matter defined in Claim 1 is therefore known from D1, and thus it is not new.

Claim 6

Claim 6 refers to a transmitter device as defined in the subject-matter of Claim 1. The same reasoning as for Claim 1 thus applies therefore to the subject-matter of the independent Claim 6, which therefore is also considered as not new.

Claim 7

Claim 7 refers to a receiver device as defined in the subject-matter of Claim 1. The same reasoning as for Claim 1 thus applies therefore to the subject-matter of the independent Claim 7, which therefore is also considered as not new.

Claim 11

Claim 11 refers to a signal as defined in the subject-matter of Claim 1. The same reasoning as for Claim 11 thus applies therefore to the subject-matter of the independent Claim 11, which therefore is also considered as not new.

Claim 12

The subject-matter of Claim 12, in the category of computer program product, is as well disclosed by D1. See D1, page 3, line 25 - page 4, line 20, page 9, lines 22-34, page 11, lines 19-28, page 13, lines 21-35, page 17, lines 3-21, page 21, lines 21-32, figure 6, element 92, figure 7.

Claim 13

The subject-matter of Claim 13, in the category of method, corresponds to the subject-matter of Claim 1, in the category of system, and same reasoning applies, mutatis mutandis, to Claim 13.

Claim 14

The subject-matter of Claim 14, in the category of method, corresponds to the subject-matter of Claim 6, in the category of device, and same reasoning applies, mutatis mutandis, to Claim 14.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

PCT/IB2004/051910

Claim 15

The subject-matter of Claim 15, in the category of method, corresponds to the subject-matter of Claim 7, in the category of system, and same reasoning applies, mutatis mutandis, to Claim 15.

Dependent Claims 2-5,8-10 - Novelty and inventive step
The subject-matter defined in dependent Claims 2-5,9-10 is also known from available Prior Art.

For Claims 2-5, dependent on Claim 1, see D1, page 2, line 32 - page 3, line 6, page 3, lines 18-25, page 4, lines 1-33, page 9, lines 21-34, page 11, lines 19-28, page 13, lines 1-35, page 14, lines 27-34, figures 2, 3, elements 46,48, figure 7.

For Claims 9-10, dependent on Claim 7, see D1, page 11, lines 19-28, page 13, lines 21-35, page 21, lines 21-32, figure 2, 3, elements 46, 48.

Consequently, the subject-matter of the mentioned claims 2-5 and 9-10 is known from D1 and thus it is not new.

Dependent Claim 8 - Inventive step

Claim 8, dependent on Claim 7, is directed to solve the problem of how to arrange the numbering of the services while providing the user with automatic best choices among the available services. A person working with the arrangements of D1 would consider as highly beneficial to feature them with such automatic arrangement. In this respect he would not disregard the teachings of D2, arriving in an obvious manner to the subject-matter of the mentioned claim.

Consequently, the subject-matter of Claim 15 lacks of inventive step.

Therefore the mentioned dependent Claims 2-5, 8-10 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty/inventive step (Article 33(2) and (3) PCT).
